

Custom Hardware Kitting

Streamline production, reduce parts waste, labor, and warehouse space!

Duncan Bolt has the expertise to track, warehouse and kit a variety of parts in various quantities so you can focus on production rather than sub assembly activities.

Our automated equipment provides accurate counts and will custom imprint poly bags with your logo.

More Benefits of Custom Hardware Kitting

- Reduce procurement efforts
- Eliminate multiple purchase orders placed for single items
- No more handling, tracking and warehousing the same multiple parts over and over
- Receive one part number (kit) instead of multiple items
- Save on labor costs associated with in house kit assembly
- Eliminate the cost of lost parts
- No more errors in hardware kits or waiting for kits to be made

*Stop tracking and Start producing.
